Information security reminder

- No client data: To ensure data privacy and compliance, entries must not use any client data in any form, including but not limited to personally identifiable information, enterprise-sensitive data, transaction records, or unauthorized EY internal data. All participants must use simulated data or public datasets throughout the development and testing process.

- Data generation requirements: If simulated data is required, the data must not map to real individuals, organizations, or events, and must not contain any information that could identify or infer the identity of a real subject. Randomly generated data, anonymized data, or open-source datasets are recommended, subject to the relevant license terms.
- Relevant policy requirements: Please strictly comply with the AI-related stipulations in the [Global Code of Conduct](#), [EY Responsible AI Principles](#), [AI Usage Policy](#) and [Acceptable Use of Technology Policy](#).
- If it is necessary to use external AI tools, their use must be limited to coding and creative design, external data research, video editing, animation production, image/text generation, etc. Please do not upload, input, or process EY internal data, client data (e.g., engagement materials), or any other non-public information. Furthermore, please strictly comply with the licensing agreements of the relevant tools and EY's data security, AI, and information security requirements.
